BACKGROUND

The NSLOGO-Regular.ttf lettering font

This is a free font and cannot be sold or be part of a commercial product.

This font was created using references from the Internet. It is based on various sources related to Google searches.

Disclaimer

This ttf font is a best effort attempt at recreating a vector based image suite related to Norfolk Southern. Some variances exist in real life and therefore there may be some discrepancies between what is supplied here and actual prototype references.

Font Usage

Installation

The file is distributed as part of a ZIP file that includes this document as well as the font itself and other related documentation.

The files need to be UNZIPPED from the distribution file into a temporary work area, like `C:\TEMP`. I'll assume that you used `c:\temp` from here onwards.

You can often just double-click the TTF file and the system will provide an install option.

Now you can install the font from the Windows `CONTROL PANEL`.

Your system may be different, but for Windows 7, you would select START → Settings → Control Panel → FONTS → FILE [pull down] → INSTALL NEW FONT

From here you would select your new file `C:\temp\`**NSLOGO-Regular.ttf**

That's it, the font is installed.

As with all other TTF fonts on your system, the NSLOGO-Regular.ttf file enclosed within the ZIP file belongs in the FONTS

folder of your windows operating system. This is the only way this file would be useful.

Result	Key	Description
DC to AC SD70ACC	}	"SD70 AC"
MW	{	"Stencil Maintence of Way"

Special Keys

Sometimes, the logo symbols require multiple colors and of course fonts are single color. This means that some shapes are broken up into multiple symbols to allow for additional colors to be added to create he final result.

In this case, there are no composite shapes that need to be combined.

Use Phantom Stencil font for the Stencil Maintenance of Way Reporting Mark Numbers.

Permission
